

Customize your Abra Suite® software with Abra ToolKit. Create custom menus, processes, actions, reports, toolbars, screens, and fields to more precisely meet your organization's unique requirements.

Superior Customizability

Abra ToolKit lets you tailor the way Abra Suite looks and functions, so you can effectively track and record information unique to your organization. By allowing you to customize menus and panels, change actions and processes, even modify reports and toolbars, Abra ToolKit affords tremendous flexibility.

With Abra ToolKit, you can create new fields, or whole new panels, to capture information in Abra HR®, Abra Payroll®, Abra Train® and Abra Recruiting Solution™. There's no limit to the number of customizations you can make. You can even combine standard Abra Suite fields with your custom fields, all on a single screen.

Enhance Your Capabilities Through Total Integration

Abra ToolKit is fully integrated with Abra HR, Abra Payroll, Abra Train, and Abra Recruiting Solution. It allows complete flexibility in tailoring your human resource information system to meet your company's needs.

Track the Information You Need—in the Format and Order You Need

Abra ToolKit lets you decide how information is categorized and how it's viewed. You can easily:

- Create new actions for employees, applicants, and requisitions
- Change the order of actions and processes
- Add, remove or change the order of steps within actions
- Create new groups of custom reports developed with Report Writer®
- Change the order of reports, remove individual reports from within groups, or remove entire report groups
- Create custom panels complete with individualized toolbar icons
- Change the order of panels within menus
- Add new programs created with the Developer's ToolKit to the application sidebar, and launch them as Windows® tasks

(over, please...)

best
