- Custom Report Writing Services
- FAS Product Upgrades
- FAS Asset Inventory Services

best

A member of the FAS Suite® of integrated asset management solutions.

FAS Asset Inventory gives you automated asset inventory tracking and reconciliation capabilities. Using state-of-the-art bar code technology, including Windows® CE and Palm OS® devices, FAS Asset Inventory creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control of your fixed assets.

Complete control over your entire asset inventory at every step.

- Integrates seamlessly with FAS Asset Accounting™, allowing physical inventory data to be easily reconciled with existing asset data
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify any data on existing assets
- Track assets at remote locations, where inventories can be conducted by exchanging data via email attachments
- “Import/Export Helper” allows you to import data from, or export data to, the most popular spreadsheets and database applications
- Windows CE and Palm OS devices make it easy to perform inventories with less expensive bar code readers containing more memory
- On-screen “Virtual Reader” lets you perform a test inventory—and even add assets—before you invest in hardware

(over, please...)

Taylor Made Software, Inc.

Reconciles—in real-time—
your physical inventory
data with your financial
records.

Hand held devices make
conducting inventory easy

- Fifty-one fully customizable fields with the ability to control data entry and notes, plus images to describe each asset record
- “Secondary Tag” field allows you to summarize assets by room location while conducting inventories
- “Groups,” “Templates,” “SmartLists” and “Search-and-Replace” features provide powerful asset management tools and streamlines inventory methodologies
- “Detail View” provides complete information including property type, class, acquisition date, supplier location, GL asset account, accumulated and expense account numbers, custodian, and more
- Customize “Group View” with drag-and-drop “freezeable” identifier columns. Display or hide columns to view precisely the information you want in the order you want to see it, all while saving your custom settings automatically
- “Check-In/Check-Out” feature with a “Check-Out History” constantly monitors assets on the move
- Also available for Microsoft® SQL Server platform

The FAS™ Family includes:

- **FASFIRSTSTEP™**
- **FAS SUITE®**
 - FAS Asset Accounting™
 - FAS Asset Inventory™
 - FAS Report Writer™
- **FAS SUITE for SQL Server**
